

Open AI Academy

AI - Foundations =

Input — AI — output

↙
The main thing is

↳ Reviewing output (X)

By

- ① Explain what AI and LLM are
- ② Describe how ChatGPT works at a high level
- ③ Write clearer Prompts
- ④ Provide useful Context

Final output — when the work is ready to use (X)
we get to clear doubts

An important question that you can ask while developing is

- ① Teach me why this architecture is chosen.
Explain the trade-off, then help me implement it step by step...
- ② Act as a senior software engineer reviewing my AI agent. Find design flaws before giving improvements
- ③ Give me hints first. Don't reveal the complete solution until I try

What is AI

What LLM can do

What are LLM

↳ Probability of Predicting next word
(machine of producing next word)

① The models has learned Patterns in language ①

↳ So say what you need, who it is for, what good looks like
use conversation as context

↳ add details, examples and background info's

check all responses

Prompting and Evaluation

Good Prompt — Context and the output

↓
① What do you need help with?

② What should ChatGPT know?

③ What kind of responses you are looking for?

→ The practical habit?

→ Give instructions clearly with

① Task ; ② Context ; ③ Expectation
what? who? How?

→ Review output with clear structure

(Complete, Logical, Evidence, Audience, Relevant)

① Task - (What) - Draft, summarize, Create, Explain

② Context - (who, why, what (Boxes, goal or constraint))

③ Expectation - Format, Length, Tone, Level of detail

The CLEAR formula

- C - Complete - Did it answer everything i asked for?
- L - Logical - Does it make sense from start to finish?
- E - Evidence - is it accurate and grounded?
- A - Audience - is it right for the person who will read or use it?
- R - Relevant - Does it stay focused on the task?

2. This - ① Task, Context, Expectation

↳ to direct the work

② CLEAR to review

Context matters

Context comes with 3 question in common

- ① What are you trying to do?
- ② What info should ChatGPT use?
- ③ What would good response look like?

Tone and style

Keep responses professional, clear, and concise. Use Plain English for a global business audience

Accuracy and clarity

If something is uncertain, say so clearly. Do not guess. and tell me what information would make the answer stronger.

the Responsibility

3 questions

→ ① Is this the right kind of task for ChatGPT to help with?

→ ② - Am I sharing only the information that is needed and allowed?

→ ③ How much human review does this output need before it is used?

④ Share what is needed and allowed for the task ④

Keep yourself in the loop

Conclusion

Know how to apply the work,
explain what you want

Ground response when details matter

Check result

Decide what is ready to use

AI-Foundation

All around Tips:

- ① Prompt writing: Task, Context, Expectation
- ② Clean to Review
- ③ Context question
- ④ Responsibility - task, information, review
